

NBS INFRA Fingal

SHAPING FINGALS SUSTAINABLE FUTURE

As part of Dublin Climate Action Week, UCD and Fingal County Council hosted an event addressing climate challenges, nature-based solutions, and planning processes specific to Fingal.

The event also marked the launch of the [NBSINFRA EU Horizon project](#), where collaboration between Fingal County Council and UCD is aimed at fostering community involvement in the planning process. This talk was a first and important step in our efforts to contribute to the sustainable future of Fingal and further events for the community will take place in the future.

The recording of this session is now available [here](#) and the timeline of the talks are below.

- 12:30 Introduction to climate challenges and NBS - Ungku Norani Sonet, UCD
- 28:00 Implementing NBS in context of Germany - Chris Munschauer, TH Koln
- 42:00 Introduction to planning processes in Fingal - Róisín Burke, FCC
- 55:20 Specific projects implementation in Fingal - Kevin Halpenny, FCC

Please be aware that, despite the recorded speech of Ungku Norani Sonet, her presentation had not been recorded. However, you can find her presentation by clicking [here](#).

WHERE IS IMPORTANT TO YOU IN SWORDS?

To ensure your voice is included, we kindly invite you to explore the [Cartospot mapping tool](#).

This tool allows you to identify challenges and valuable areas in the context of Swords. Simply place pins on specific locations and provide additional details about what you value in your neighbourhood or see as potential challenges.

Your input will help us identify key challenges and better understand the area's strengths and vulnerabilities.

We would appreciate some of your inputs in the Cartospot by the **Friday 11th of October**.

FUTURE WORKSHOPS

Based on findings from the Cartospot Map, we will start preparing and designing a community-based workshop on mapping specific projects and policies for Swords.

This workshop will aim to explore the community's insights in shaping a climate-resilient environment. It will also assist UCD in developing an optimal framework for citizen participation in the planning process.
